

# Amethyst Coloring Sheet

Amethyst is a purple gemstone often used in jewelry. It is a type of quartz. The purple color comes from small amounts of iron and other impurities present in the mineral.

Amethyst is found all over the world. The ancient Greeks and Romans believed that amethyst had special powers and would wear it as a talisman to protect against drunkenness and other negative behaviors. Amethyst is the birthstone for February and the traditional gift for the 6th and 17th wedding anniversary. Amethyst can be found in different shades of purple, from light lavender to deep purple. Amethysts can also be heat treated to enhance their color, this process is done in a laboratory and it's not harmful to the stone.

Amethyst is relatively affordable, making it a popular choice for people who want a beautiful gemstone without breaking the bank.
